# TechEd Stream

Master Engineering,  
Through Visual Animations

TechEd Stream is a web app that solves every engineering problem, regardless of the uniqueness of each question

# Overview

There's an engineering student, prepping hard for his semester exams. He thinks, "Best strategy—let me solve the Previous Year Questions (PYQs)!"

He solves them, but then gets stuck at the classic dilemma: **"Are my answers correct or not?"**

While it's best to drill down into the details in the following slides, if you would like to give your audience some context before diving in, this is the perfect place. You'll have plenty of opportunities to elaborate later.

## TechEd Stream

# Overview

Then he discovers **TechEd Stream**.

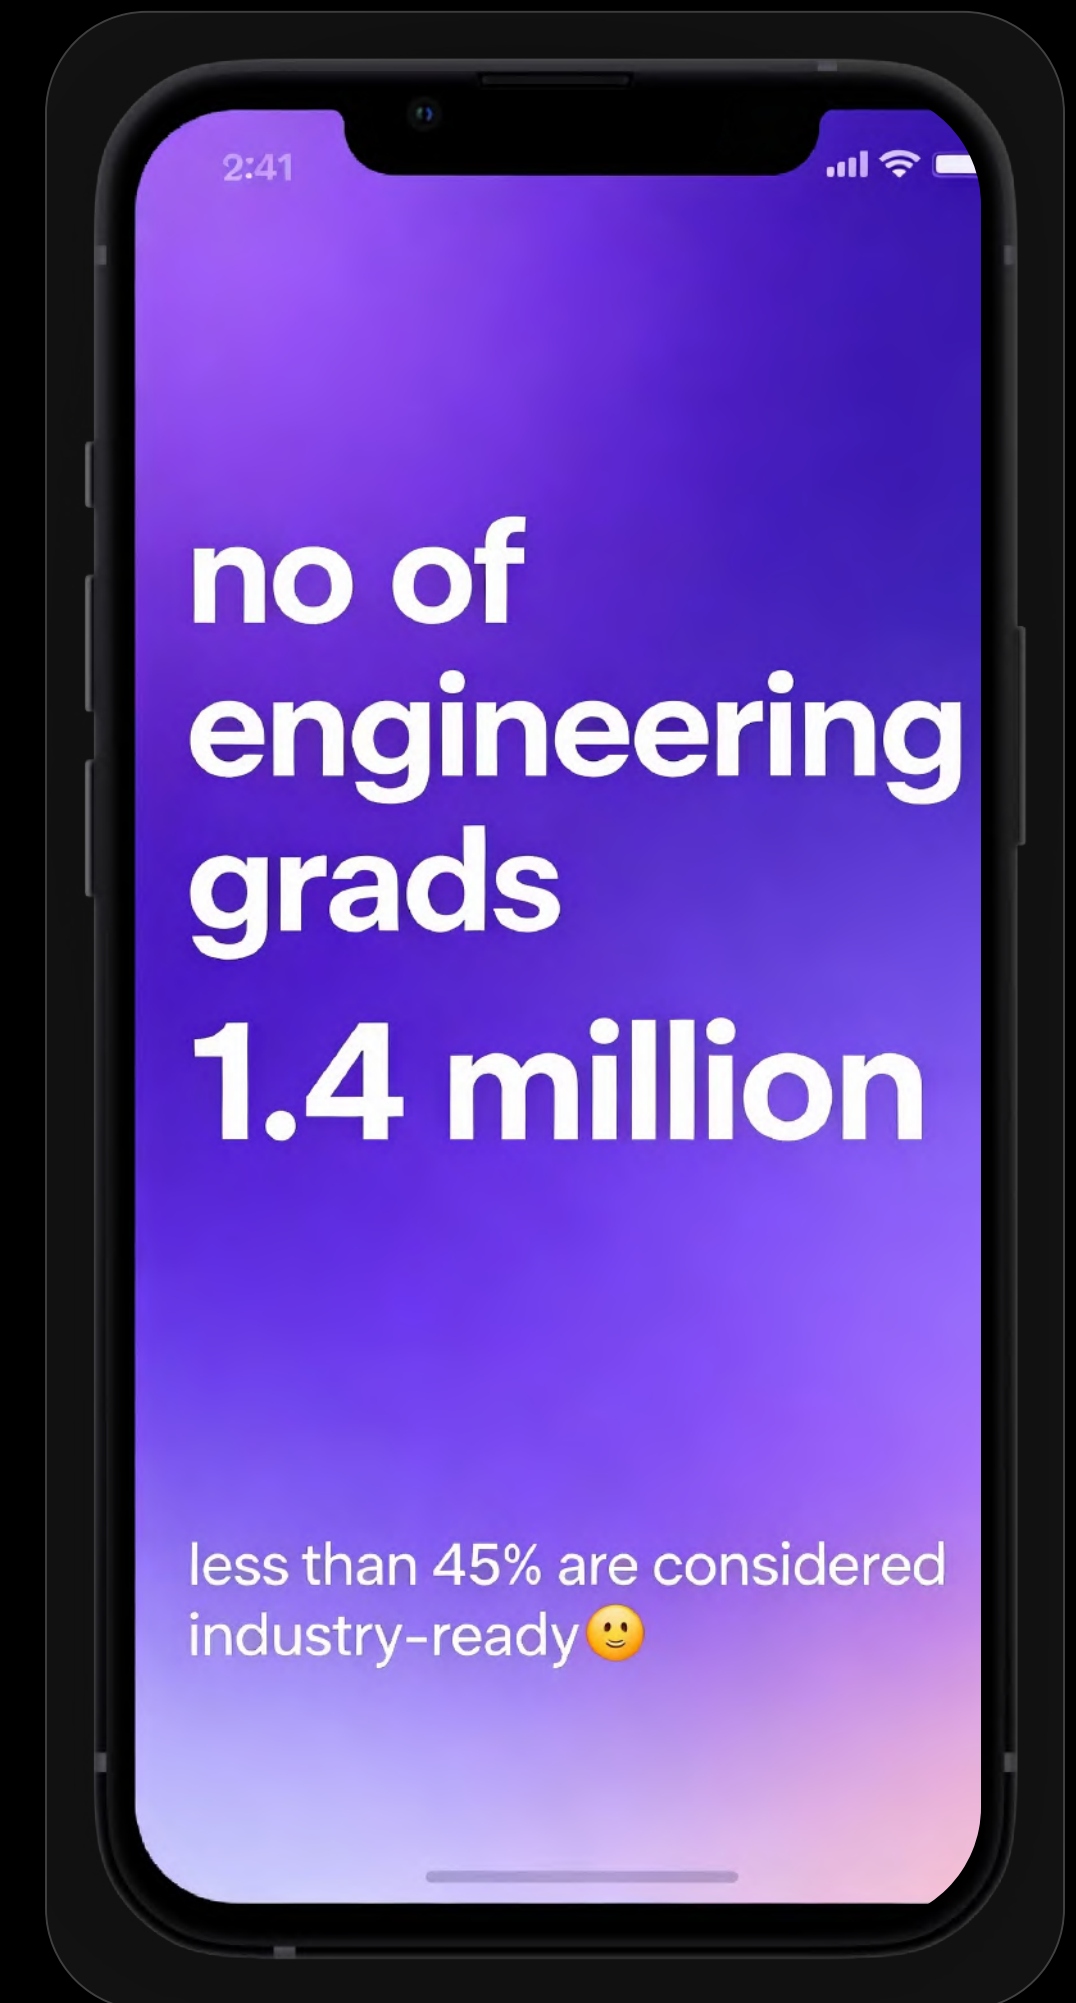

Now he gets every PYQ problem broken down step-by-step, animated solutions, clear explanations, and understands not just the answer, but the real concepts behind each question.

## The Struggle with Traditional Learning

1. Engineering subjects often rely on static notes and theoretical diagrams
2. Limited visualization leads to poor concept understanding
2. Existing study platforms are generic – not tailored for every engineering Questions.
4. **Students face difficulty** relating formulas to real-world applications

# Problem

# Market Research

| Feature                    | NPTEL (IITs)         | Coursera/Udemy  | TechEd Stream         |
|----------------------------|----------------------|-----------------|-----------------------|
| Interactive Simulation     | ✗                    | ✗ (Video-Based) | ✓ (Core Feature)      |
| Parameter-Driven Output    | ✗ (Theoretical)      | ✗ (No)          | ✓ (Instant Results)   |
| Engineering-Specific Focus | ✓ (Deep & Technical) | ✗ (Broad)       | ✓ (Deep & Visualized) |

# Market Research

3

Million students in India  
struggle with visualization-based  
learning

78%

of students rely solely on notes  
or YouTube for concept learning

10

billion dollars is the number by  
which The Indian EdTech industry  
is projected by 2025

TechEd Stream addresses a critical gap – **interactive, subject-specific visualization**

The market is ripe for disruption with a solution that actively engages students rather than passively presenting information.

TechEd  
Stream

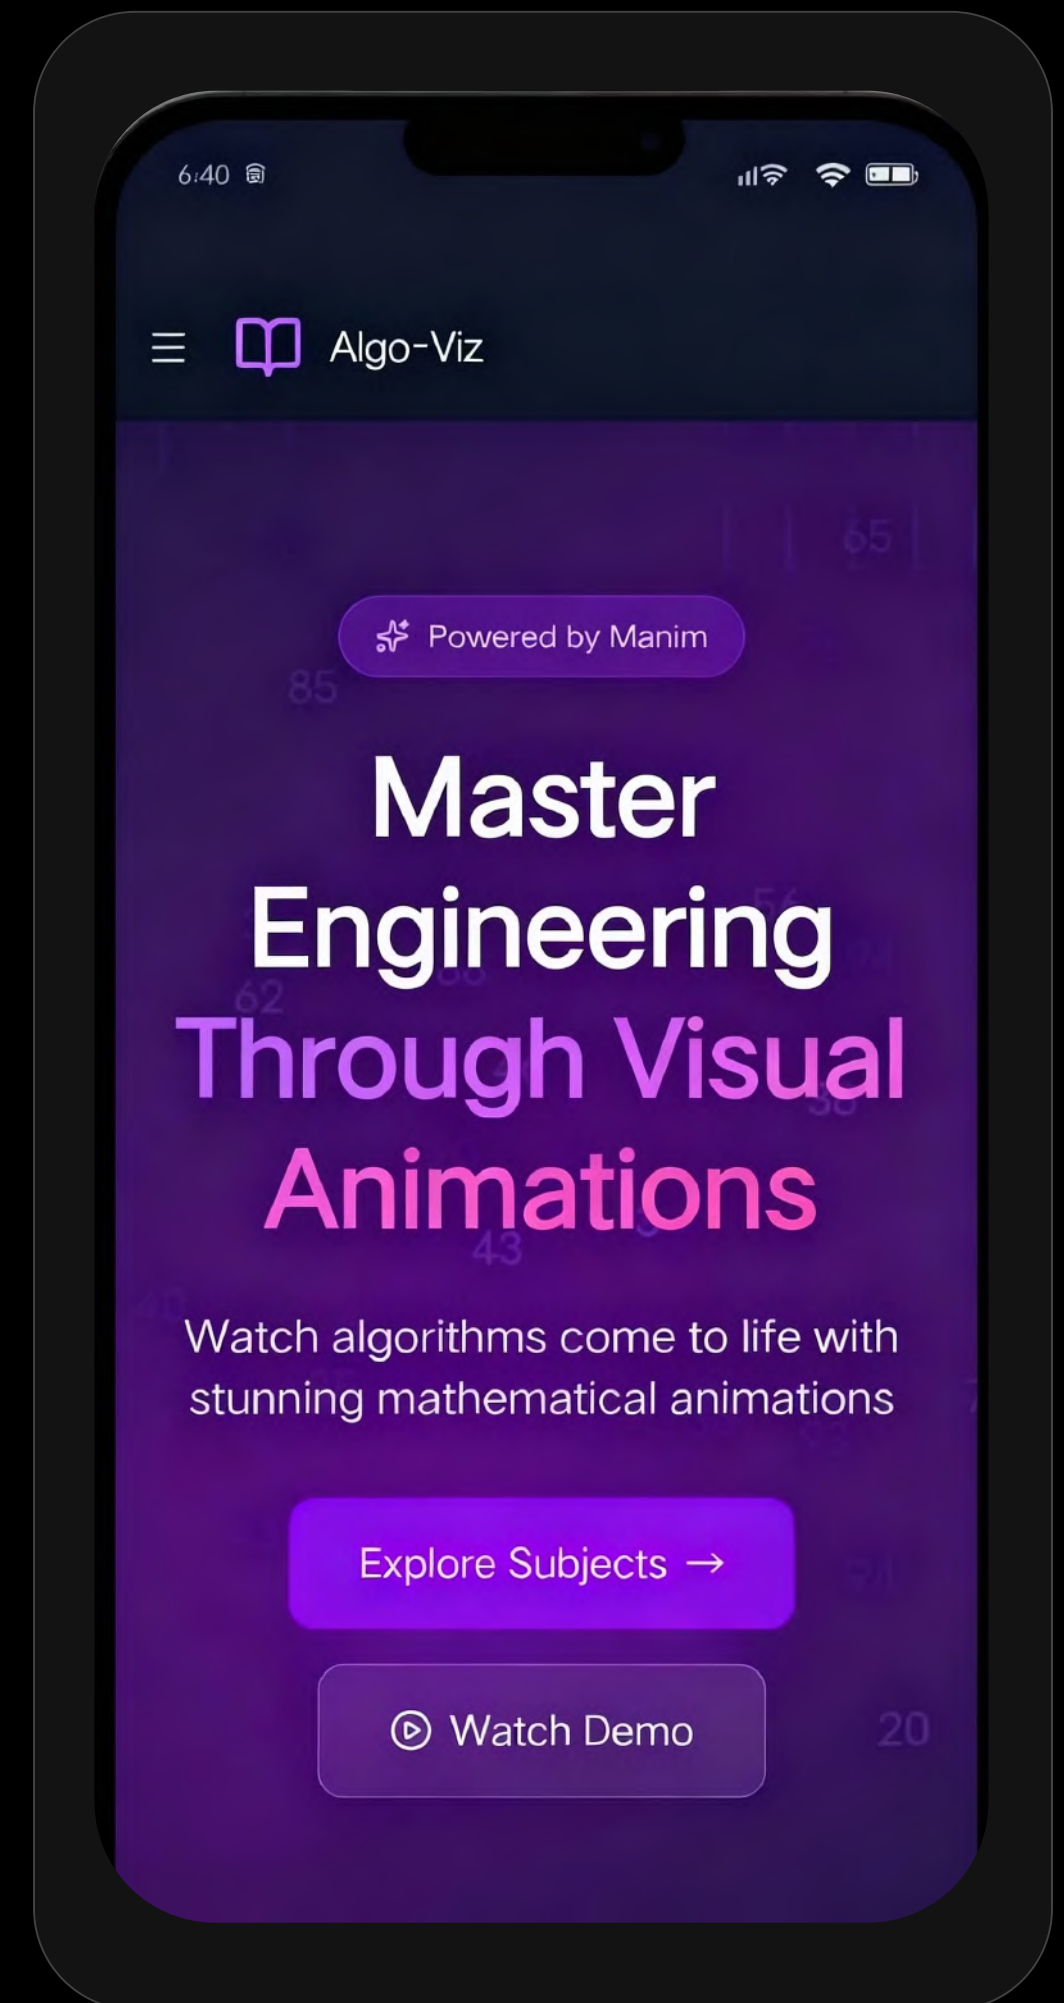

*From formulas to future – we turn  
complexity into clarity.”*

## Our Innovation: TechEd Stream

# Solution

# Features

## 1. Step-by-Step Animation

Design processes explained via detailed animations  
Complex mechanisms and processes shown in motion

Assignment Problem Using Hungarian  
Step 3: Column Reduction  
Check if a column has atleast one zero  
if Found a zero :- check next column  
If not Found :- Subtract the minimum entry of column  
same column

|   | A | B | C | D  |
|---|---|---|---|----|
| 1 | 2 | 2 | 0 | 4  |
| 2 | 6 | 4 | 0 | 30 |
| 3 | 0 | 1 | 0 | 57 |
| 4 | 2 | 4 | 0 | 60 |
| 5 | 2 | 0 | 0 | 56 |

# Features

## 2. Customizable Parameters

Change load, dimensions, or material properties

Get accurate results instantly

Connect theory directly to practice

Assignment Problem Using Hungarian Algorithm

Step 2: Row Reduction

Subtract the minimum value in each row from all entries in that row.

|   | A  | B  | C | D  | E  |
|---|----|----|---|----|----|
| 1 | 20 | 10 | 0 | 60 | 10 |
| 2 | 24 | 12 | 0 | 66 | 12 |
| 3 | 18 | 9  | 0 | 57 | 12 |
| 4 | 20 | 12 | 0 | 60 | 12 |
| 5 | 20 | 8  | 0 | 56 | 12 |

# Features

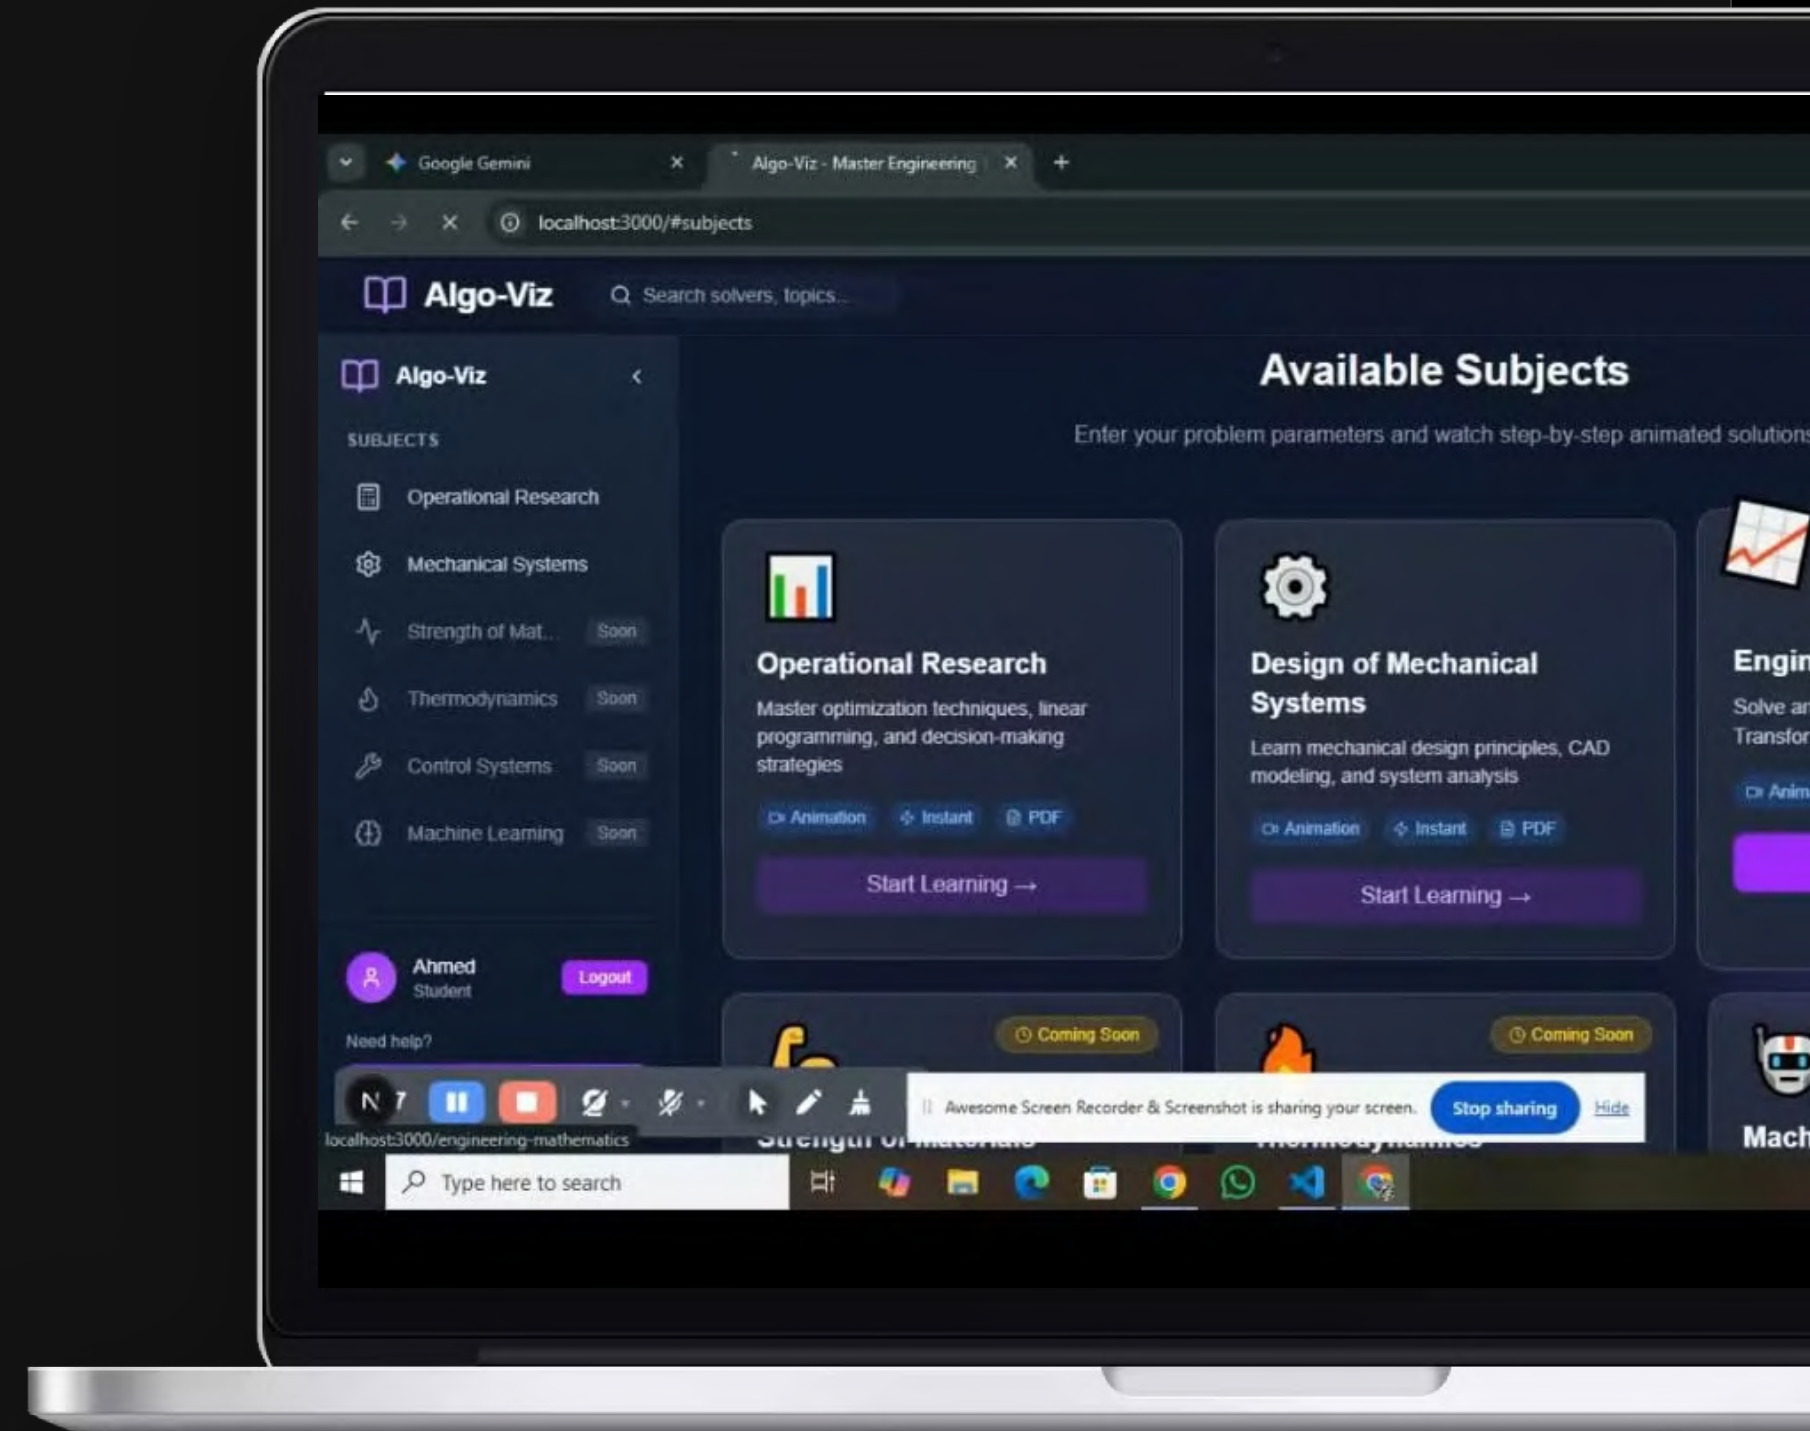

## 3. Cloud-Based Access

No heavy software installation required

**Integrated Problem-Solving**

Generates problems based on simulations

Reinforces learning immediately

TechEd  
Stream

**An Interactive Web-Based Learning Platform for Engineers We don't just show you, we involve you.**

# Product differentiators/ How is our product Novel

#1

Parameter-Driven Simulation

#2

Interactive Animations.

#3

First-of-Its-Kind Integration

## 03 What does our Users say

**We are conducting usability tests and surveys to validate that TechEd Stream:**

**Directly improves understanding** of complex concepts

**Reduces study time** through efficient visualization

**Increases engagement** with interactive learning

**Early Testimonials:**

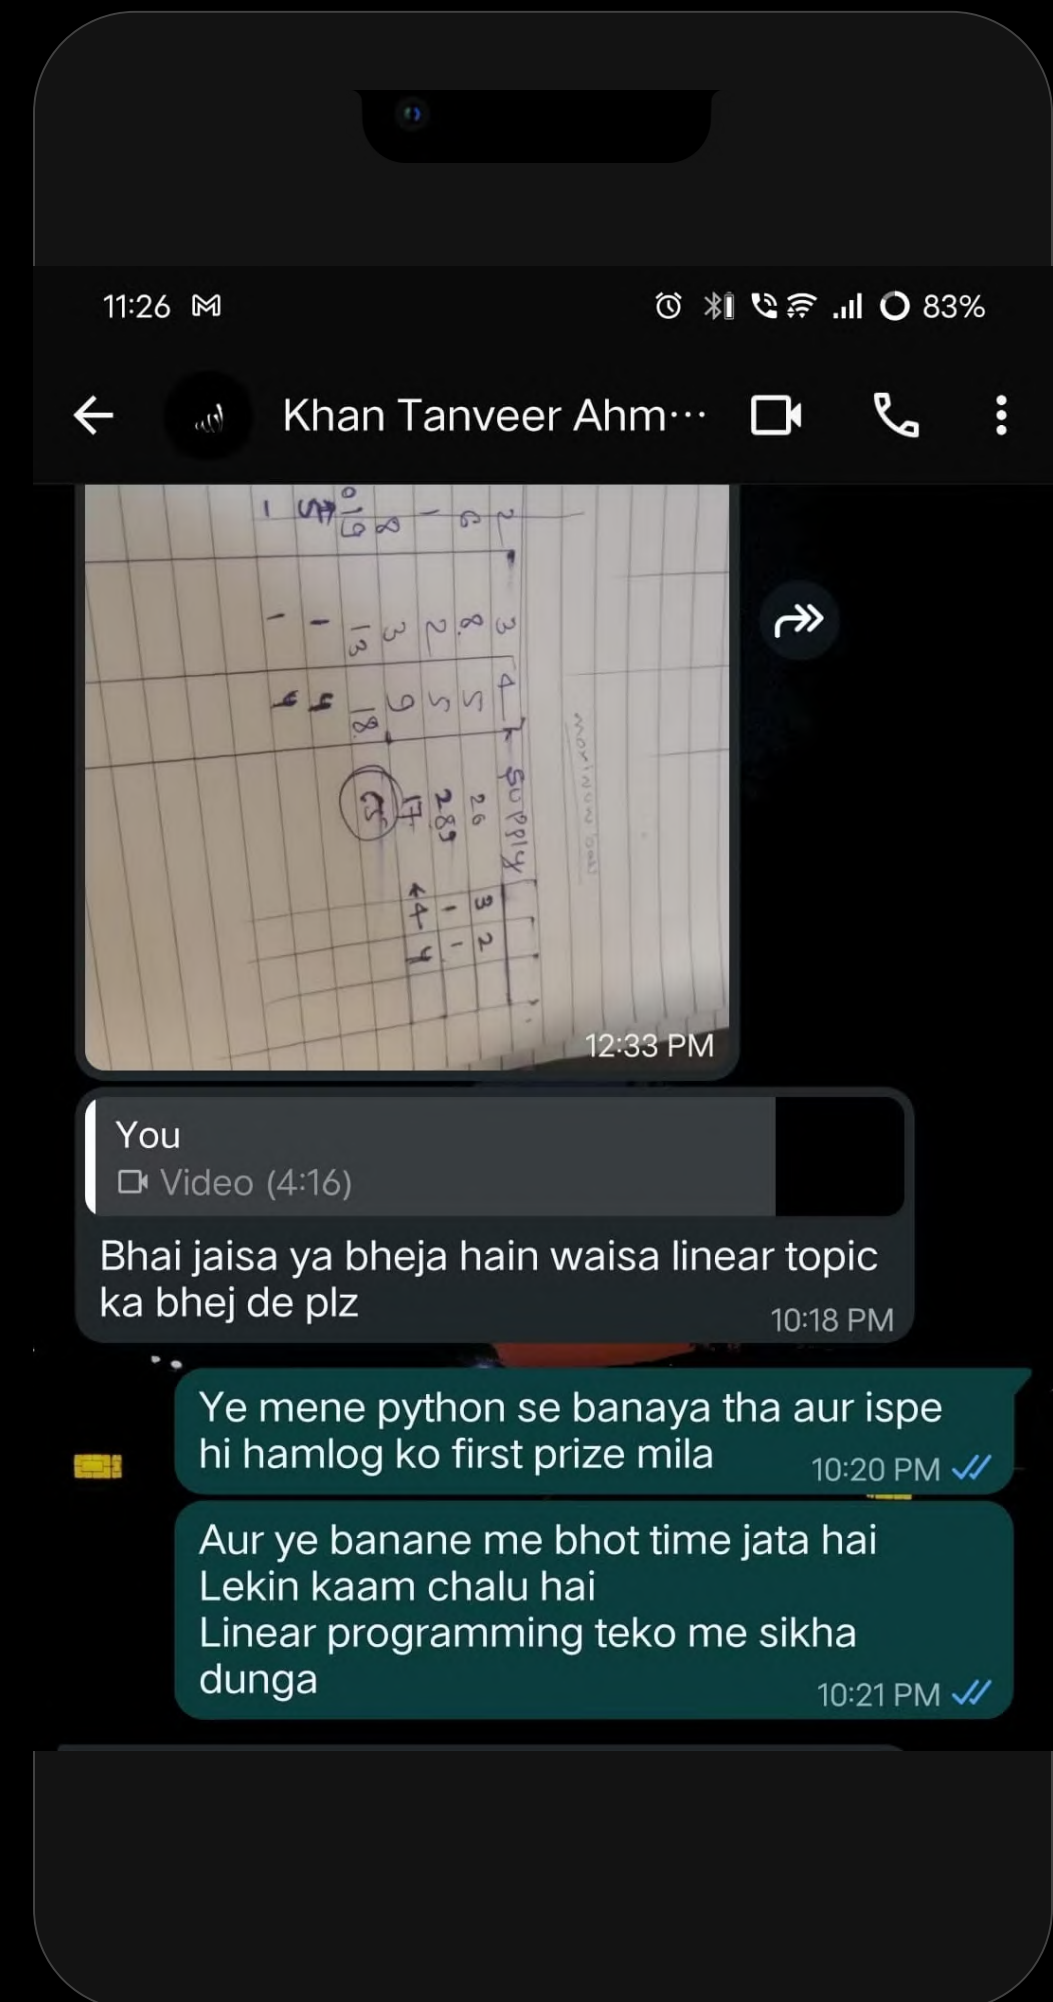

*"It helped me visualize beam deflection instantly!"* – Engineering Student

*"Makes complex topics like stress analysis much easier to grasp."*

– Mechanical Engineering Student

*"I wish our classroom tools were this interactive."* – Faculty Reviewer

# Case Study

”The web application was able to teach students the solution conceptually well .

# Business Model

Target Audience : B2C (Engineering Students)

Secondary audience : B2B (Institutes)

## Pricing

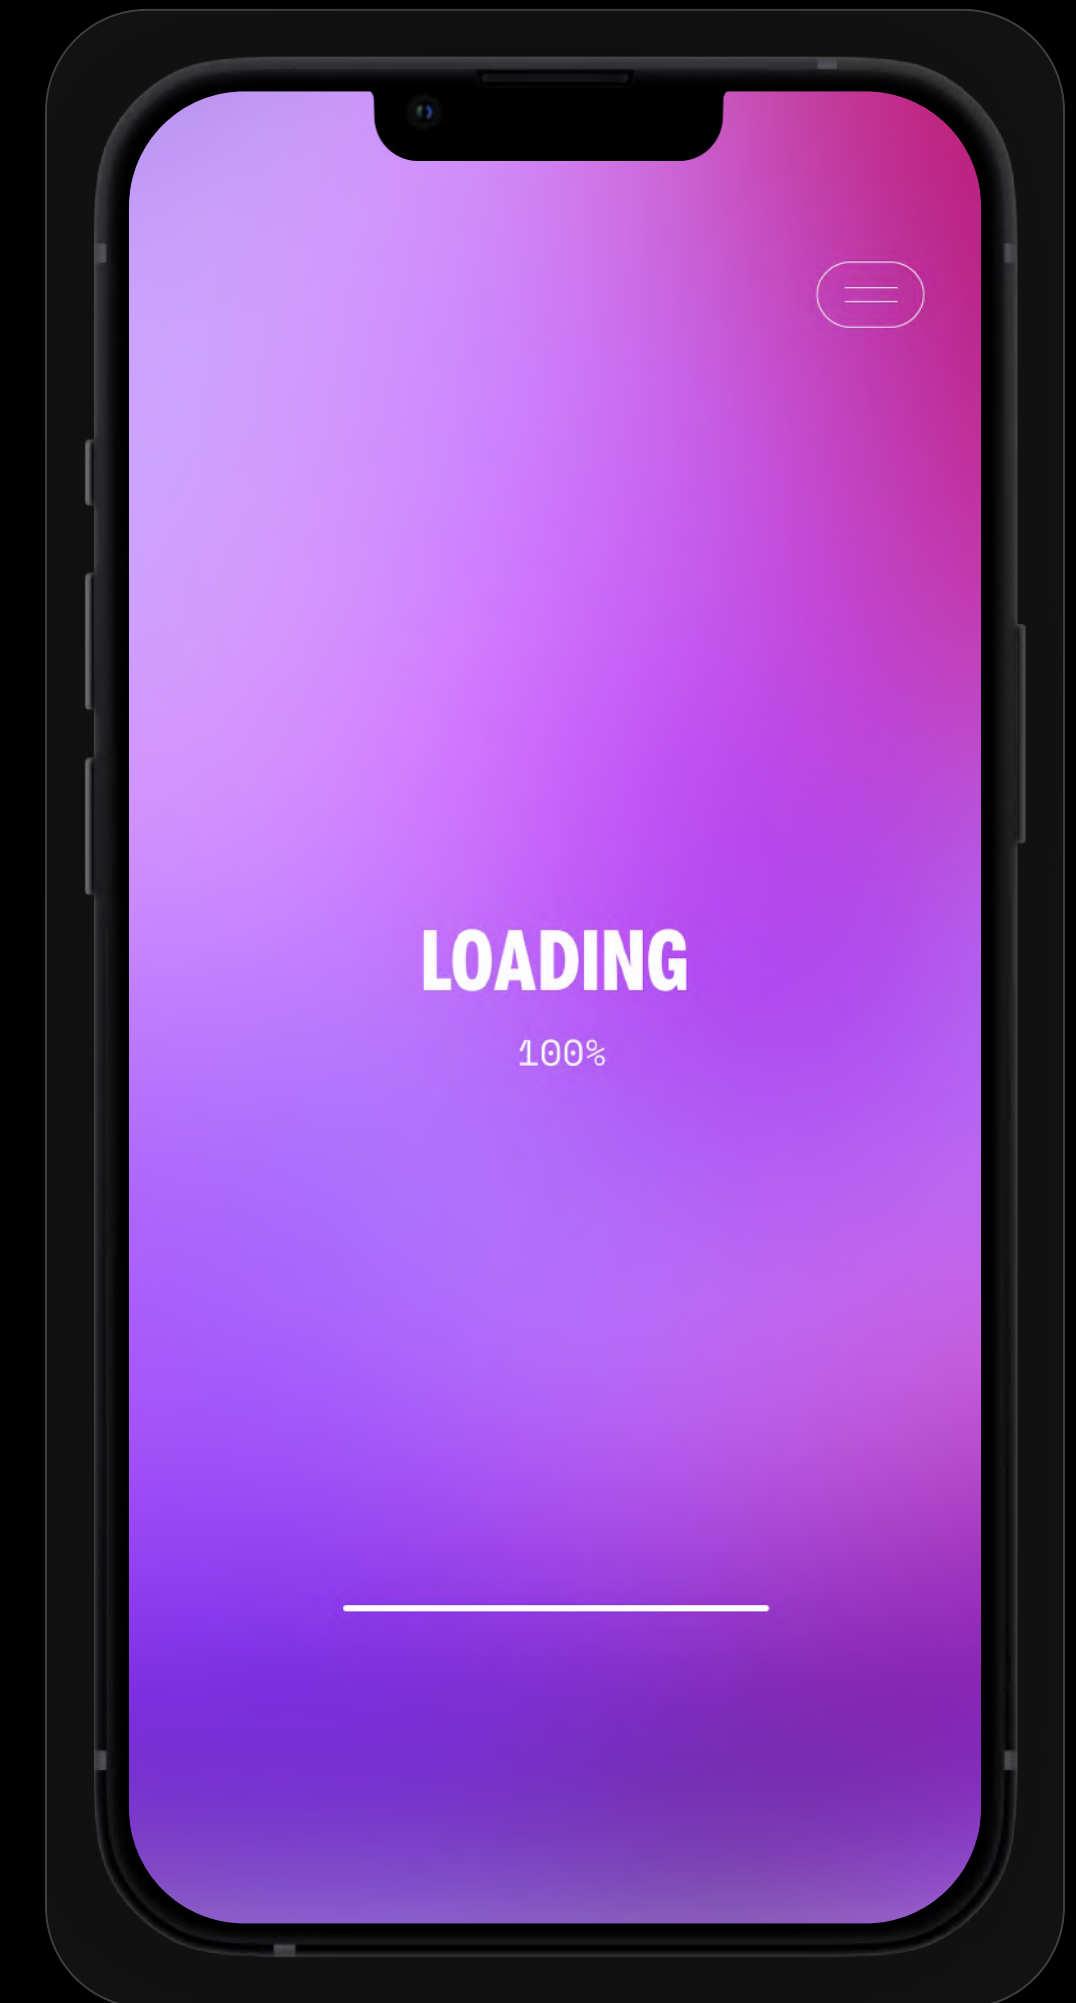

| Budget                               | Economy                               | Premium                                      |
|--------------------------------------|---------------------------------------|----------------------------------------------|
| 1 user<br>100 searches<br>2 subjects | 2 User<br>1000 searches<br>5 Subjects | 5 Users<br>Unlimited Searches<br>18 subjects |
| 300Rs                                | 500Rs                                 | 1500Rs                                       |

# 04 Market Segmentation

**Phase 1:** Focus on Mechanical Engineering

**Phase 2:** Expand to Civil and Electrical Engineering

**Phase 3:** Scale to all engineering branches

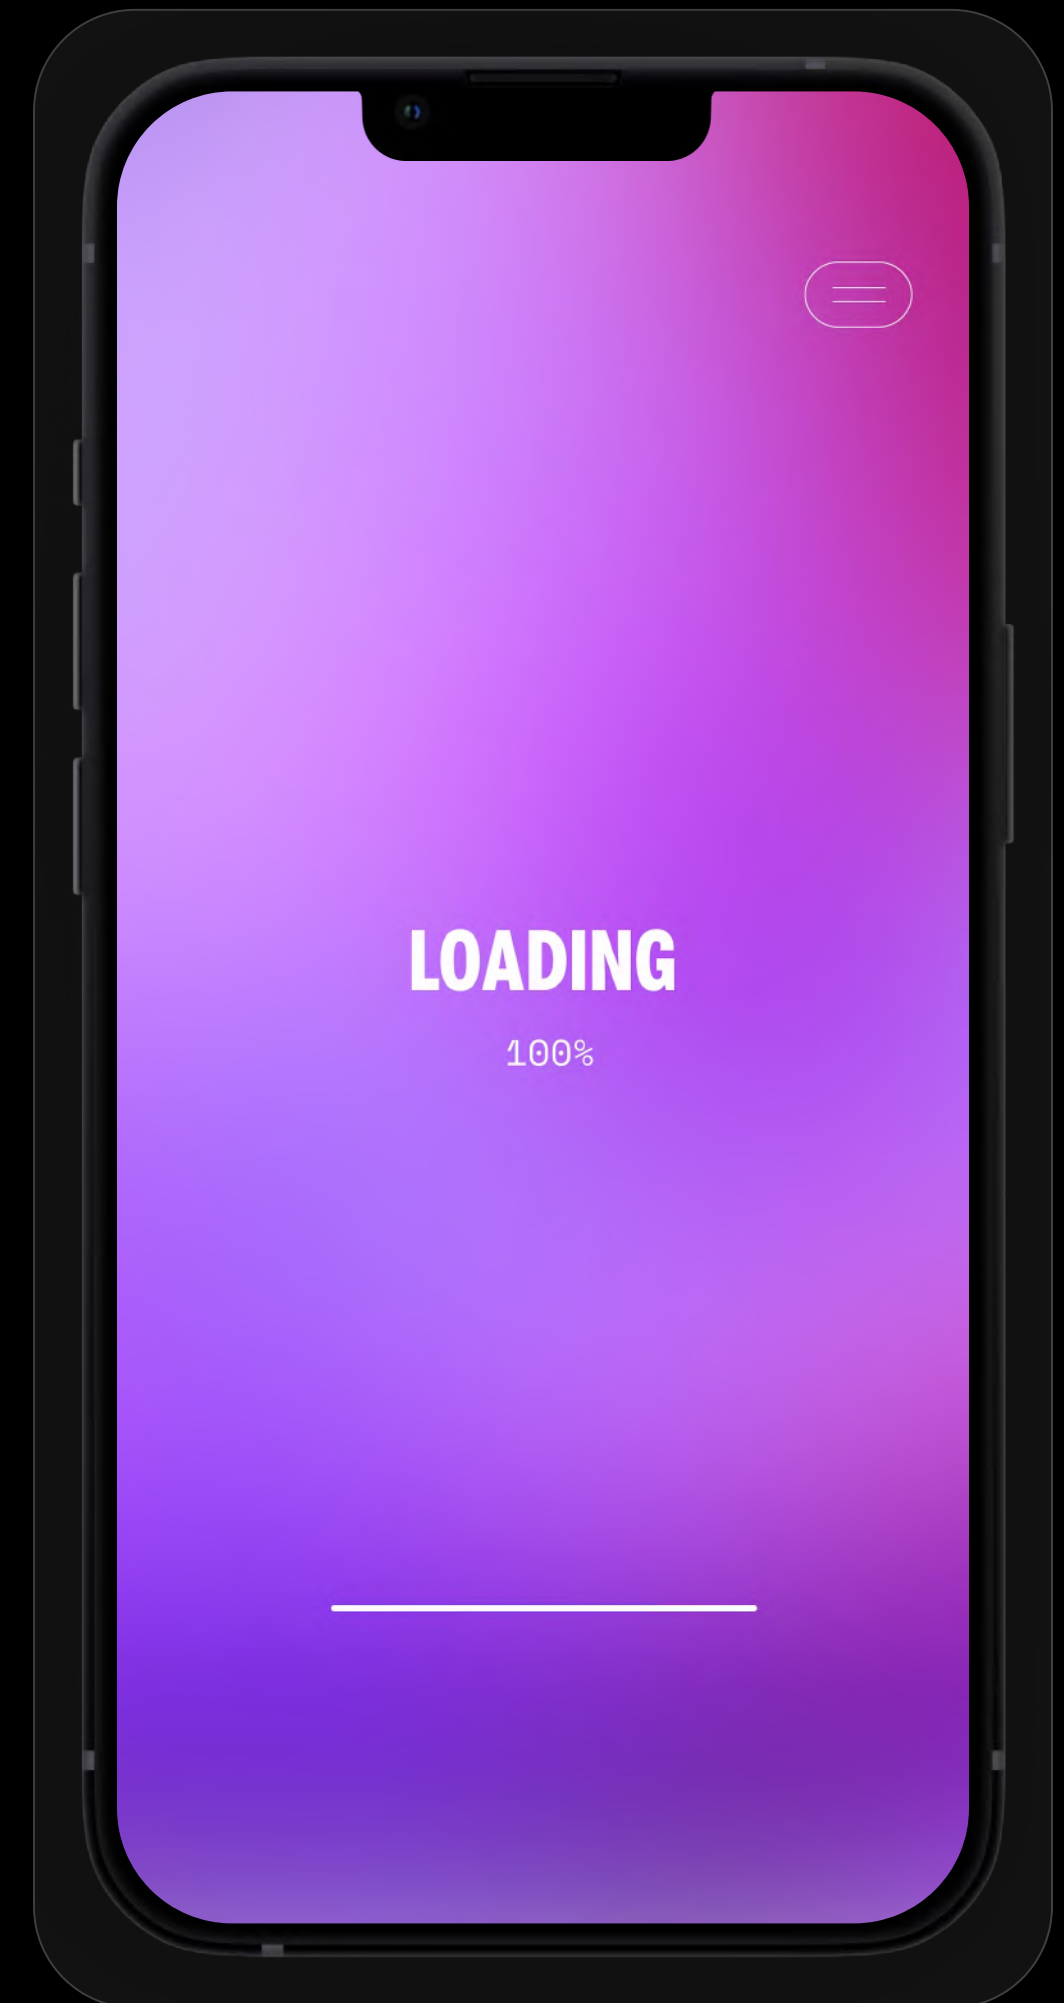

# 04

## Market Size

**~3 million Indian engineering students** (immediate market)

**1.5 million annual graduates** (recurring market)

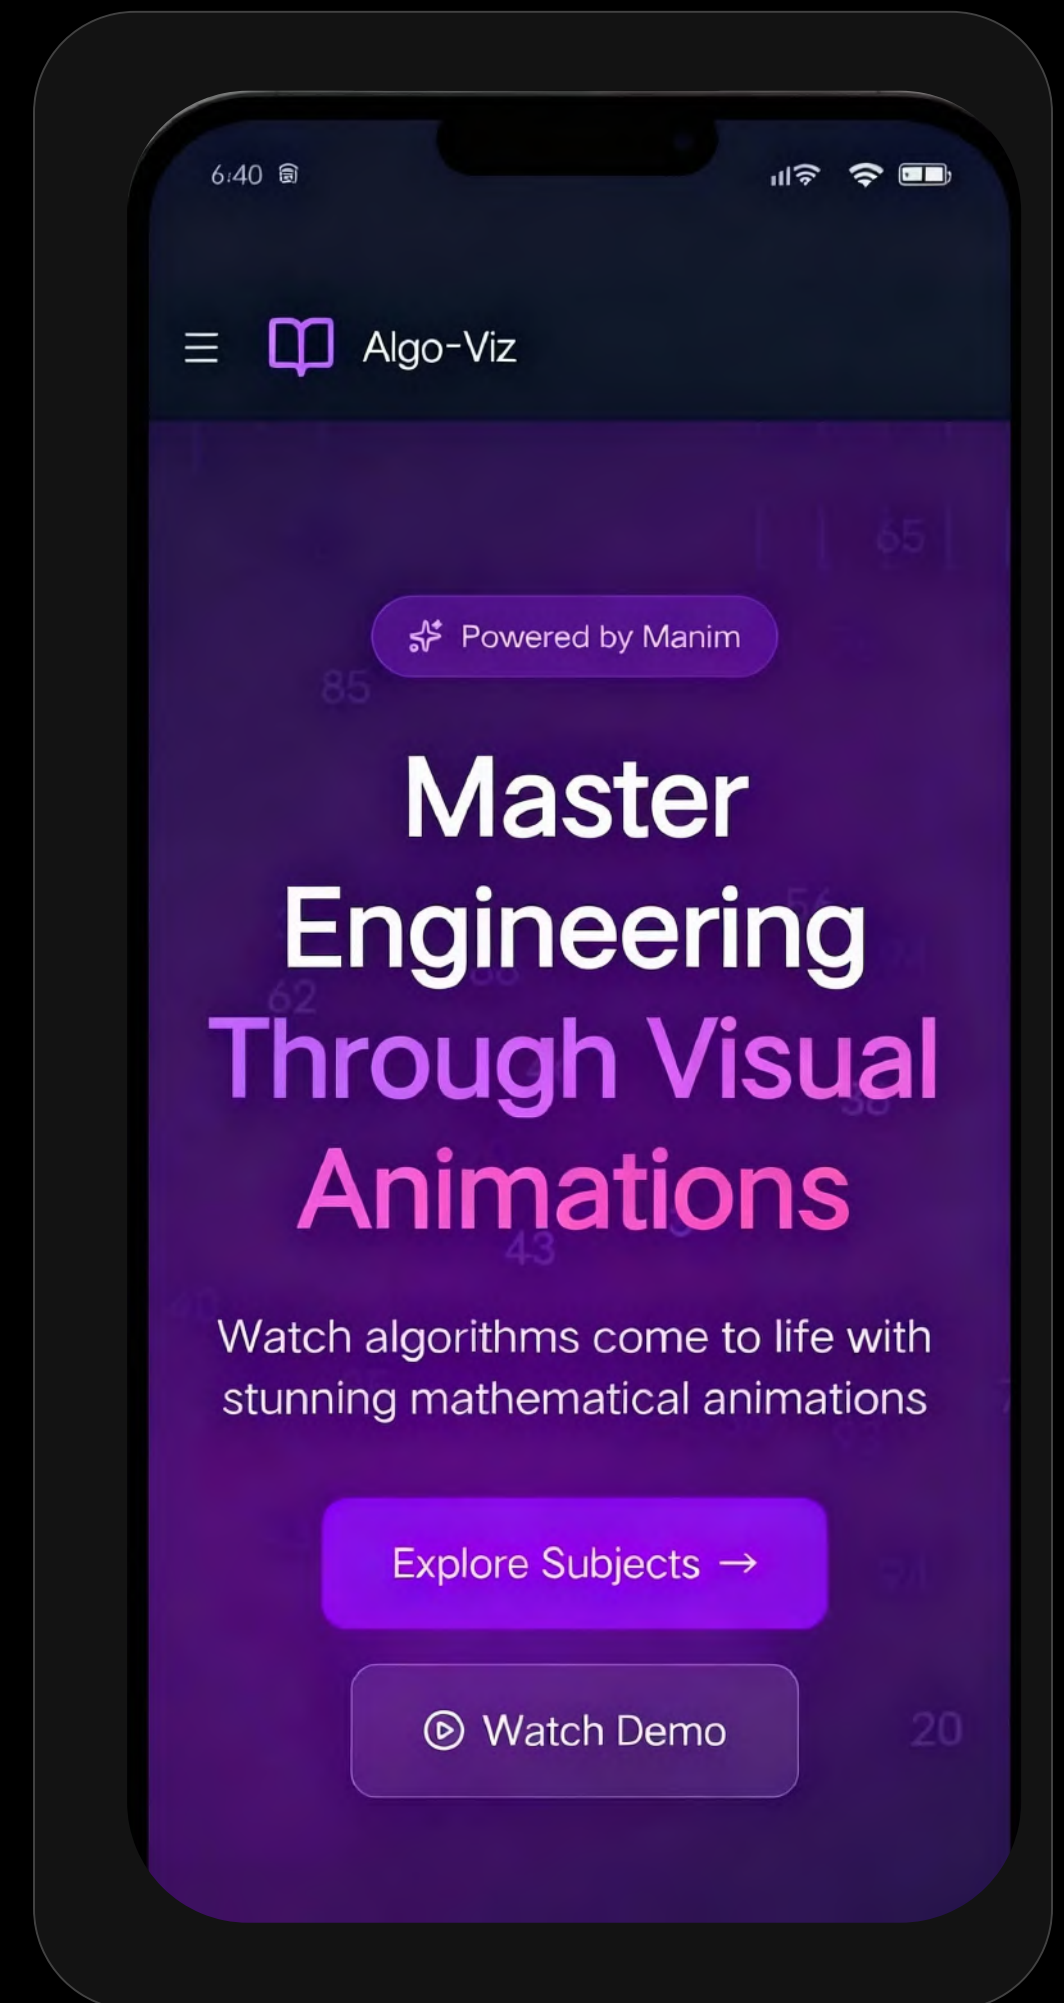

**Institutional market:** 6,000+ engineering colleges in India

# 04 Roadmap

- 1: Prototype Development (3 months)
- 2: Beta Launch (2 months)
- 3: Expansion (3 months)
- 4: Public Launch

# Next Steps

# TechEd Stream

## Funding Strategy

1. Seek incubation from college startup platforms
2. Apply for seed funding from EdTech investors
3. Explore government grants for education innovation
